(54) TUBE FOR MEDICAL TREATMENT

(57)Abstract:

PURPOSE: To provide the tube for medical treatment which can improve the insertability of an insertion means to be inserted into the channel of a curving part while assuring the sufficient curving of a curving part.

CONSTITUTION: This tube for medical treatment consists of a resilient material in at least a part of its curving part 2 and is provided with a tube 6 having the surface of the coeff. of friction lower than the coeff. of friction of at least the curving part 2 within the channel 20 of the curving part 2.
